TEAK

We exclusively use carefully selected mature teak wood, harvested in strict accordance with our environmental policies. The renowned durability of teak is attributed to its high natural oil content, which limits moisture absorption, prevents warping, and provides exceptional stability. Additionally, teak is highly resistant to pest attacks. These qualities, combined with its striking hue and grain, contribute to teak being widely regarded as “the noblest of all wood types.”

STAINLESS STEEL

Stainless steel is celebrated for its corrosion resistance, thanks to chromium and nickel. However, in chlorine-rich environments like swimming pools or coastal areas with salt exposure, it can suffer from “pitting” corrosion. To enhance its durability, we recommend electropolishing, which further improves corrosion resistance. Electropolished stainless steel is the ideal choice for applications exposed to harsh conditions, ensuring both longevity and aesthetic appeal.

For the Ninix and O-Zon collection we recommend electropolishing treatment of the frame if it is to be used in a corrosive environment.

POWDER COATING COLOURS

Our powder coatings provide a premium, eco-friendly alternative to conventional paints, releasing minimal volatile organic compounds. Renowned for their outstanding durability, they resist chipping, fading, and scratching, guaranteeing a long-lasting and appealing finish.

CONCRETE

We use an ultra-high performance concrete reinforced by natural mineral components and organic fibers. Thanks to its discontinuous pore structure and crack-bridging fibers, it is virtually impervious. Penetration of chloride ions is also significantly reduced and thus performs exceptionally well in highly corrosive environments such as near beaches.

CEMENT GREY

GLASS

Our glass is produced from the finest standard float glass, which is reheated in a kiln until it becomes pliable. During this process, the glass takes on a slightly wavy texture as it conforms to the surface of the kiln. Once cooled, the underside is coated with a ceramic paint, and the glass is then fired again. This process hardens the paint by fusing it into the surface and tempers the glass, increasing its durability. The slight texture in the glass surface is a natural result of the production process.

CATEGORY C MATERIALS POLYSKIN

Polyskin is available for the Strappy and Styletto collection.

Polyskin is a synthetic leather alternative engineered for outdoor use. It offers the look and feel of leather, with exceptional resistance to UV exposure and moisture. Durable, weatherproof, and low-maintenance, it brings a refined tactile quality to the Strappy and Styletto collections without compromising performance.

OUTDOOR COVER

Each Royal Botania piece can be paired with standard or tailor-made outdoor cover designed to offer lasting protection in all weather conditions. Made from durable polyester with a PU coating, the covers are water-repellent, UV-resistant, and breathable to prevent moisture buildup.

SILVER GREY

BATYLINE

Many of our seating collections feature slings made from Batyline®, a high-performance woven polyester fabric coated with PVC. This coating offers outstanding resistance to UV rays and harsh weather. With no moisture absorption, Batyline® slings are quick-drying, highly stain-resistant, and easy to maintain, making them ideal for long-term outdoor use.

PARASOL FABRICS

For our Palma, Shady (Slim), and Bloom parasols, we use a thicker fabric with a specialized coating that offers enhanced protection against the elements, ensuring greater durability and lasting elegance in outdoor conditions.

PARASOL BATYLINE

The Batyline® used for our Oazz parasol is woven with a tighter structure and treated with an additional protective coating, enhancing its resistance to sun, wind, and rain for long-lasting performance outdoors.
